FLAMMABLE LIMITS: LOWER: ND

UPPER: ND

AUTOIGNITION TEMPERATURE: 725 F estimated

GENERAL HAZARD: ND

FIRE FIGHTING INSTRUCTIONS: Wear structural fire fighting gear. As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

EXTINGUISHING MEDIA: Water spray. Regular foam. Dry chemical. Carbon dioxide.

HAZARDOUS COMBUSTION PRODUCTS: Combustion may produce carbon monoxide, carbon dioxide and other asphyxiants.

SECTION VI - ACCIDENTAL RELEASE MEASURES

LAND SPILL: Contain spilled liquid with sand or earth. DO NOT use combustible materials such as sawdust. Use appropriate personal protective equipment as stated in Section VIII of this MSDS. Advise the EPA and the appropriate state agencies, if required. Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Vacuum or sweep up material and place in a disposal container.

WATER SPILL: Clean up leaks/spills immediately to prevent soil or water contamination.

DUAL PURPOSE VACUUM PUMP OIL (revised Sept 2004)

ENGINEERING CONTROLS: Use with adequate ventilation. Ventilation is normally required when handling or using this product to keep exposure to airborne contaminants below the exposure limit. Mechanical ventilation recommended.

PERSONAL PROTECTION: Respiratory protection and chemical gloves not needed under proper conditions of use unless product is heated. Recommend chemical goggles and wear boots, protective gloves (neoprene, nitrile, viton), aprons, drench showers, eye wash as needed for protection against spills and/or splashes. Respiratory protection is not usually needed unless heated or misted. Half-mask air purifying respirator with dust/mist filters or HEPA filter cartridges is acceptable for exposures to (10) times the exposure limit. Full-face air purifying respirator with dust/mist filters or HEPA filter cartridges is acceptable for exposures to (50) times the exposure limit. If greater than (50) times exposure limit use positive pressure demand full face supplied air respirator or SCBA. Where splashing is possible, full chemically resistant protective clothing and boots are required which are composed of Polyvinyl alcohol(PVA), neoprene, nitrile, viton and polyurethane.
