Swing Jib Kit shown w/optional accessories: Bench, tool bins and computer not included.

48" high column x 36" long swing boom. Includes tool trolley. Rated 30 Lbs. maximum capacity. Order tool balance reel and accessories separately.

Torque Neutralizing Tool Stabilizers

Take a step towards OSHA ergonomics standard compliance by fitting workstations with Torque Neutralizing arms. Available for either air or electric tools. Lightweight anodized aluminum arms support weight of tool and easy positioning while preventing transmission of rotational forces to worker's hands or wrists. Units include tool balancer, telescoping positioning arms and rolling trolley for mounting in lateral tool rail on workstation or on bench mounted jib with swing boom (jib included). Electric tool models feature secure tool clamp which may also be used for electric or air powered pistol grip tool. Air tool models feature a U-joint manifold which supplies air to tool and allows vertical and horizontal tool positioning. All steel parts protected with durable baked polyester finish. Order model for correct type and weight tool. Tools not included.

- Stops transmission of torque to worker's hand, wrist or arm
- Supports air or electric powered tools from 0.5-5.0 Lbs.
- Arm telescopes from 18-25" also includes 9" hinged arm
- Depth: 6" • Material: Steel/aluminum
